Patient Name  
Address

Dear ,

By participating in The Total Lung Care Program at Middlesex Hospital, you have taken an important step in becoming an active member of your healthcare team. Early detection is a valuable tool in identifying lung abnormalities. Early detection CT lung screening may detect cancers not visible on chest x-rays, at the time when these cancers are still in an early stage with a high probability of a cure.

**The radiologist who interpreted the results of your exam has recommended that you make a follow-up appointment with your PCP to go over the results of the lung-screening test. Radiology recommended a CT in 3 months which will now be covered by insurance.**

This letter serves as a reminder to you to make an appointment with your physician. A copy of your results has been forwarded to your primary care physician identified on your consent form. If you have any needs or questions please do not hesitate to call me at #860-358-2030. Thank you for your participation in the Total Lung Care Program.

Sincerely,

Gean Brown, RN, OCN  
Clinical Manager  
Total Lung Care Center
