

# NWMS COVID-19 Vaccine Info

Washington state allocates vaccines weekly depending on the availability from the government and the increased demand from expanding phases.

Please visit our website for updates on vaccine eligibility, waiting lists and how to schedule your vaccine!

**Please do not call the clinic, we are making every effort to keep our phone lines open to patients.**

**If you received your vaccine already, it is important that you let your provider know. Please also bring a copy of your vaccination card with you to your appointment.**

For those who have received the vaccine-

**Do I need to wear a mask and avoid close contact with others if I have gotten 2 doses of the vaccine?**

Yes. Not enough information is currently available to say if or when CDC will stop recommending that people wear masks and avoid close contact with others to help prevent the spread of the virus that causes COVID-19.

Experts need to understand more about the protection that COVID-19 vaccines provide in real-world conditions before making that decision. Other factors, including how many people get vaccinated and how the virus is spreading in communities, will also affect this decision. We also don't yet know whether getting a COVID-19 vaccine will prevent you from spreading the virus that causes COVID-19 to other people, even if you don't get sick yourself. CDC will continue to update this page as we learn more.

While experts learn more about the protection that COVID-19 vaccines provide under real-life conditions, it will be important for everyone to continue using all the tools available to help stop this pandemic.

**To protect yourself and others, follow these recommendations:**

- **Wear a mask over your nose and mouth**
- **Stay at least 6 feet away from others**
- **Avoid crowds**
- **Avoid poorly ventilated spaces**
- **Wash your hands often**
