The Honorable Nancy Pelosi Speaker of the House of Representatives U.S. Capitol Building, H-222 Washington, DC 20515

The Honorable Mitch McConnell Senate Majority Leader U.S. Capitol Building, H-230 Washington, DC 20510 The Honorable Kevin McCarthy House Republican Leader U.S. Capitol Building, H-204 Washington, DC 20515

The Honorable Charles Schumer Senate Democratic Leader U.S. Capitol Building, S-221 Washington, DC 20510

Dear Speaker Pelosi, Leader McConnell, Leader McCarthy, and Leader Schumer:

The undersigned organizations, representing patients, medical researchers, physicians, survivors and their families, are pleased that important policies to increase diversity in clinical trials were included in the 21<sup>st</sup> Century <u>Cures 2.0 concept paper</u> recently released by Representatives Diana DeGette and Fred Upton. We encourage Congress to include proposals from Title IV of the Cures 2.0 concept paper in upcoming legislation to further address the COVID-19 public health crisis. These clinical trials policies are bipartisan, well vetted, and broadly supported in the community, leaving no reason for delay.

The COVID-19 public health crisis has highlighted existing disparities in our nation's health care system. Clinical trials are an essential part of our health care delivery system. Despite the importance of diversity in clinical trials, racial and ethnic minorities, women, children, and rural populations remain vastly underrepresented in trials across the country. Diverse populations must be represented in clinical trials to help address inclusion issues throughout the research and delivery of treatments, and to ensure patient access to high-quality healthcare.

Clinical trials often provide the best treatment option for patients with life-threatening conditions and lack of coverage for routine care costs should not be a barrier to enrollment. As a result of the current public health crisis, families across the country are facing greater financial strain, making the need to ensure this barrier is not limiting patient access to clinical trials even more urgent.

Specifically, we urge leadership to include policy to provide Medicaid coverage of the routine care costs of clinical trials participation for patients with life-threatening conditions in every state. This critical protection is championed by Representatives Ben Ray Luján and Gus Bilirakis in the *CLINICAL TREATMENT Act* (H.R. 913).

Additionally, we support recommendations in the Cures 2.0 concept paper to improve demographic data, increase awareness and understanding of importance of trials, make clinicaltrials.gov more user friendly, and improve coordination between the Food and Drug Administration (FDA) and Centers for Medicare and Medicaid Services (CMS).

We appreciate your commitment to solutions as our nation faces new challenges. Thank you for your consideration of our requests.

## Sincerely,
