

19TH ANNUAL

New Orleans Summer Cancer Meeting

Empowering Oncology Professionals by Enhancing Cancer Care Through Innovation and Knowledge

PROGRAM DIRECTOR

Edgardo S. Santos Castillero, MD, FACP, FASCO
Medical Director – Broward, Florida
The Oncology Institute of Hope and Innovation
Clinical Associate Professor/Charles E. Schmidt College of Medicine
Florida Atlantic University
Vice-President, Florida Society of Clinical Oncology (FLASCO)
President, FLASCO Foundation
Broward County, FL

CONFERENCE DESCRIPTION

The NOSCM is a beacon of hope and knowledge in the relentless fight against cancer. This year, we delve deep into the theme of improving cancer survival rates through prevention, early detection, targeted therapy, and comprehensive survivorship care. Our program is meticulously crafted to cover the most pressing topics in oncology, including:

- Cutting-edge Pharmacology
- Advancements in Cancer Genetics
- Progress in Neuro Oncology
- Innovations in GI & GU Cancers
- Addressing Disparity in Cancer Care
- The Role of Immunotherapy (IO)
- Updates on Sarcoma Management
- Advances in Thyroid-Thymoma Treatments
- Enhancing Survivorship Quality
- The Integration of AI in Medicine
- Breakthroughs in Breast and Thoracic Oncology
- Hematology Frontiers
- Heme Pharmacology Innovations

With a focus on novel therapies such as immunotherapy, targeted agents, and cytotoxic agents, alongside crucial discussions on side effects management, genetic risk factors, and more, the NOSCM is poised to offer invaluable insights and knowledge.

Deep Dives into Immunotherapy: Explore the latest strategies to improve outcomes, tackle resistance, and personalize treatment plans.

Precision Medicine in Practice: Learn how next-generation sequencing (DNA and RNA) is revolutionizing cancer care, making personalized treatment a reality for patients across the globe.

LEARNER OBJECTIVES

Attendees of the NOSCM will emerge with enhanced skills and knowledge using a multidisciplinary and interprofessional team approach, ready to make a significant impact in their practice:

- **Assess and Manage Cancer Patients:** Tailor cancer care to meet the unique needs of the elderly.
- **Recognize Cancer Screening and Mortality Reduction:** Apply the latest screening strategies to save lives.
- **Overcome Care Disparities:** Identify and eliminate barriers to equitable cancer care.
- **Harness Molecular Profiling:** Utilize DNA and RNA sequencing for precise oncologic patient management.
- **CART-T- Cell Therapy:** Recognize its indications, applications, and management of side effects.
- **Immunotherapy Innovations:** Explore new uses and combinations in various tumor types.
- **Manage Therapy Side Effects:** Identify and treat side effects from targeted, immunotherapy, and chemotherapy promptly.
- **End of Life, Survivorship, Genetics in Cancer, and Related Topics:** Incorporate a wide range of issues within oncology and palliative care, touching upon the biological, psychological, social, and ethical aspects of cancer management and care.
