

# APMC Spring Workshop: Remaining Focused on Value-Based Care Transformation Workshop

Wednesday, April 6, 2022 | 2:00 – 4:45 EDT

With the Oncology Care Model (OCM) coming to an end with no replacement formalized and the Radiation Oncology Model experiencing continued delays, participating cancer programs are considering how to maintain their focus on their journey toward value-based cancer care delivery. Specifically, the discontinuation of the OCM MEOS payments has caused participants to consider strategies to continue providing successful practice transformation programs and services without supplemental funding. This is leading cancer programs to consider alternative care settings and diversified service offerings. In this workshop, we will explore strategies that cancer programs may consider to maintain their focus on delivering high quality cancer care.

**2:00 – 2:05 PM EDT**

## **Welcoming Remarks**

**2:05 – 2:40 PM EDT**

## **Optimization of Cancer Care Settings**

Stephanie Hobbs, MHSM, CMPE, Associate Principal, *ECG Management Consultants, Inc.* (Moderator)

Mark Liu, MHA, Director of Strategic Initiatives, *Mount Sinai Health System*

A brief overview of alternative care setting opportunities: oncology-specialized urgent care, hospital at home, community paramedicine, and remote patient monitoring (RPM), including:

- Regulatory/ healthcare utilization benefits
- An overview of RPM and its value proposition to the oncology patient
- Methods to implement RPM in oncology

**2:40 – 2:45 PM EDT**
