Where?
Japanese Cultural Center of Hawaiʻi
Manoa Grand Ballroom
2454 S. Beretania St. 5th Floor
Honolulu, HI 96826
HOLY MACRA! Preparation Workshop

About

Mountain-Pacific Quality Health, Hawai‘i Department of Health (HDOH) Heart Disease and Stroke Prevention Program (HDSPP), and Hawaii Medical Association are offering a workshop to help with reporting MACRA.

If you did not apply for Comprehensive Primary Care (CPC+) and want to navigate MACRA at your own pace, this workshop provides specific fundamentals and reporting options for 2017, the first MACRA reporting year.

The second half of the workshop will be customized for the practices that attend. We are recruiting by electronic health records (EHR) system utilized. If you use HPH Epic, Queens Epic or Elation, representatives will be on-site to provide technical tips for documenting information and tracking population health outcomes.

Speakers

Captain Tom Duran, RPh, is the principal point of contact for the Centers for Medicare & Medicaid Services (CMS) programs in Hawai‘i and the Pacific Territories. He has worked closely with the CMS Region 9 MACRA outreach team and is well versed in MACRA fundamentals.

Dr. Fauzia Khan is an Internal Medicine physician and is the chief medical officer for Persivia, a data and analytics Healthcare IT company. She is well versed in population health and how technology assists in this endeavor. Her publication on point-of-care decision support underscores her understanding for the need to fill the gap between medical practice and IT support. She can speak directly to practicing physicians as to where this payment transformation is heading and of what they need to be aware.
